

BlueAlly Integration Center

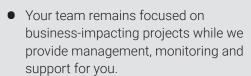

BlueAlly's integration center is a one-stop resource for integration and delivery of multi-vendor infrastructure and workplace solutions.

The integration center, centrally located in the US, is secured with remote surveillance and monitoring, and has AC and DC electrical capabilities. Services are available for compute, storage, converged, wired and wireless network, security, and voice.

Solution Features:

- Validation of hardware functionality
- Cost savings from reduced on-site time and expense
- Loading dock for large volume or over-sized devices
- Inventory management and asset tagging
- Eliminates need for physical space requirements at client site
- Great for multi-vendor environment and projects
- Hardware integration
- Burn-in process
- Installation of operating system software
- Firmware/software upgrades
- System configuration
- Full asset/inventory tracking
- Package and ship (palletized or boxed and wrapping available)
- On-site assistance for unpacking, racking and stacking
- Implementation services on-site or remote
- Post cut-over support

Why BlueAlly?

- BlueAlly is an extension of your staff to gain economies of scale and more predictable costs.
- 24x7 device monitoring, management, and support
